

## **PRACTICE TASKS FOR CLAIT 2006 - LEVEL 1**

### **UNIT 7 – WEB PAGE CREATION**

(Copyright Martin Barrett, 2009)

A comprehensive set of practical tasks designed to give learners practise at specific assessment objectives for Unit 7 of the OCR Clait 2006 Level 1 qualification.

The tasks and solutions are supplied on CD-ROM in PDF format. They can be printed out easily and quickly without the need for any other software other than Acrobat Reader, which is supplied on the CD. The tasks can be placed on an Intranet for easy access by students and staff. They are also available in editable Word format.

Each stand-alone exercise is supplied with all the required data files, and comes complete with a fully annotated marking copy, so that students or tutors can quickly and easily check their work.

There are 45 individual tasks and solutions which combine to cover all the evidence based assessment objectives of Unit 7 of the OCR Clait 2006 Level 1 qualification.

They are designed to be used by learners to practise and assess specific skills. They are perfect as “build-up” tasks before learners attempt “full blown” practice or live assignments. They are brilliant for providing learners with additional practice in specific areas where extra reinforcement is required.

The tasks are completely independent. They can be tackled selectively and in any order. Any required “raw” data files are supplied for each task.

Although specifically designed for CLAIT, the tasks are suitable for any I.T. course or qualification involving basic web page creation skills.

All the tasks are very clearly laid out, identifying the skills included in the task and the names of any data files that are required. All the data files are task specific, and can be placed in any work area required (e.g. floppy disk, local hard drive, network drive).

The majority of tasks and solutions fit onto a single sheet of A4. Solutions are very clearly annotated, making it quick and easy to establish whether the task objectives have been met.

You are allowed to print and photocopy the materials as many times as you wish.

The tasks that are included are listed overleaf, together with a sample task and solution.
